DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to a fuel composition comprising a spark-ignition fuel, a detergent and a deposit inhibitor compound, classified in class 44, subclass 300+.
 - II. Claims 21-22, drawn to a fuel composition comprising a hydrocarbonaceous fuel, a succinimide-acid derivative and a manganese containing deposit inhibitor, classified in class 44, subclass 415.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions, specifically claim 21, is a product by process claim wherein an amino acid is used, the examiner is assuming that applicant is claiming a product different from those dependent upon claim 1 and thus the claims are not related.
3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
